

POO™

Introducing a new digital platform for Creating, Sharing and Reading comics & manga!

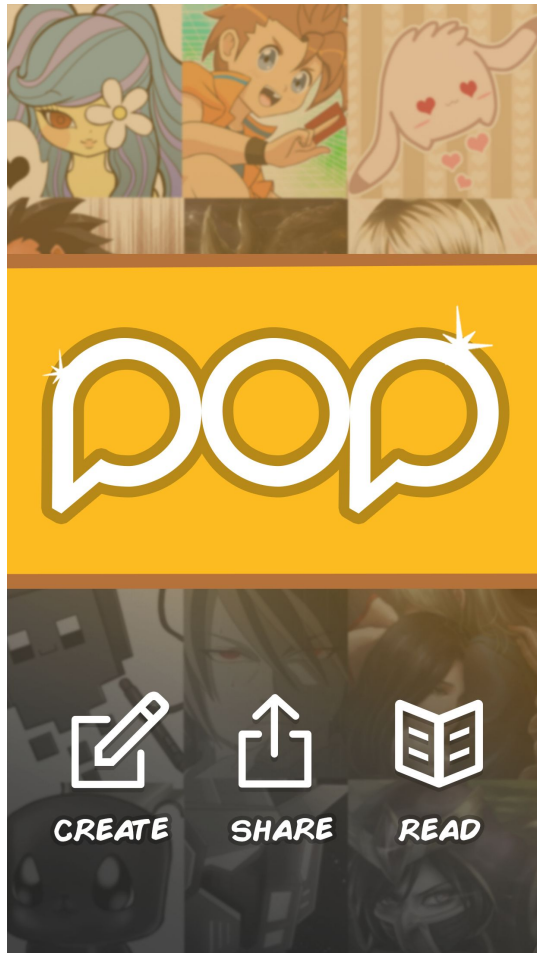

What is POP?

- POP is a mobile-first manga & comics platform.
- Easy to use, with no barriers to entry and zero cost to users.
- Users can upload, share, read and comment on comics, all from a phone or tablet.
- POP was created with one simple goal in mind: to foster a thriving mobile manga & comics community.

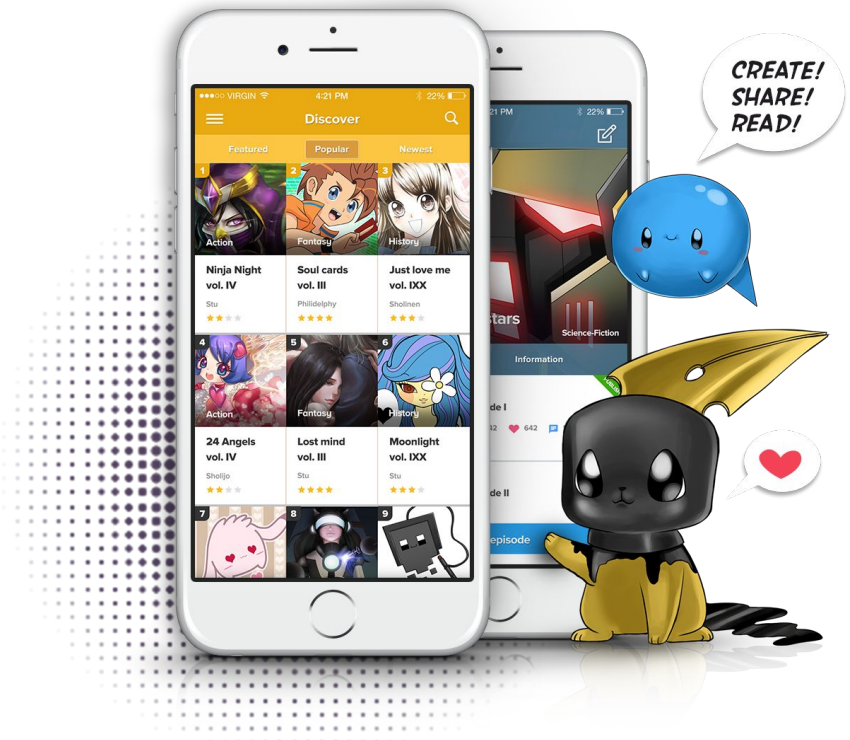

How does POP work?

- An elegant, mobile-optimized UI that makes creating, sharing and reading mobile comics both easy and fun!
- Use our Discovery screens to find great new Series. Then subscribe to get updates whenever a new Episode is released!
- To read, just swipe up or down!
- [Watch the demo video](#) to see the app in action!

Why use POP?

- Creators have complete control and full ownership over the comics they upload – ensuring an optimal reading experience.
- POP Comics utilizes an ad-supported Freemium business model with unobtrusive, interstitial ads inserted between pages of comics to reach as many readers as possible.
- POP gives 70 percent of ad income to its comic creators, so every view means money in the artist's pocket.
